## **Preface**

Rich and right is a Christian novel based on God's principles, and His interest in governing one's success in finances.

It encourages and guide readers who are interested in using whatever they have to raise the standards as required by the Spirit. Depending on required measures and guidance from God to possess rightly.

## Contents

Possessing rightly.....	1
Concepts about business success.....	8
Conditions.....	11
More of His blessings.....	14
Winners of God’s blessings.....	16

## Possessing rightly

First we need to know that God can help your life to succeed regardless of what you see or what you are going through. Currently it is of great treasure to possess wealth under the influence and support of God because God provides both life and wealth to everyone. Let us accept that God will continuously work to develop our lives according to our prayers the steps we take to stand as righteous people and the cheerful work we have among ourselves.

Our need to know that it is possible to become rich at the same time standing right with God comes from listening and the development of ideas to stand as a righteous people.

Developing a life of creating wealth and managing opportunities starts with one's ability and desire to make life that suits to the standards of this world. Using time, skills, and experience to generate or make more funds is a culture of many characters. This is Godly because finances represent a kind of power and support which also God need to do His work.

To become winners of God's promises and possessing wealth by the help of His hand we need to stabilize our faith and improve areas below.

- i) Your relationship with God.
- ii) Identifying sources of your blessings.
- iii) Understand the season of God's favor.

To enjoy God's promises you need to accept God as your leader, and provider. There must be a clear walk within the parameters of His righteousness, commandments, obedience and love of Him.

Some people prefer to work out their prosperity or success outside God's support or knowledge. Through faith it's possible to include God in your endeavors that He may add value and help for the sake of your development in the direction of His Will. When you combine your faith with God's love and His power to make you succeed, life will excel, you will be able in all what you do to keep ahead of others in acquiring and possessing.

You will encourage other disciplines which are also essential in maintaining your financial standards. For example

Tithing and giving which is part of our worship to God.

Reaching out to the needy which is obedience.

It is not God's will many of us to live in poverty but to some cases it is our blindness or lack of revelation to see how much we can work with God for our excellence. Sometimes we don't see time, opportunities and favoring environments in places that God has given and blessed. This makes us to lose time and steps. Our first prayer would be to see chances the way God sees them to take steps of possessing in line with God's will.

Isaac was observing, in a state of seeing what is the best of his life and his men.

He also dwelt in Ge'rar and believed in God the provider who would finish his journey of possessing successful.

He accepted that God was always behind his efforts acting in a direction which includes God's knowledge and provisions.

He did not fight the herd men of Ge'rar but he accepted the state of continuing in the direction which was best for him.

Our faith must speak to us giving us knowledge, inspiring our minds to know the power behind our efforts.

How many times have we returned to God during hard times for right directions, His will and knowledge in our businesses, ministries, finances or relationships.

We should challenge our minds to know that God always narrates our stories of possessing and acquiring.

From the time you began to accept that He is your provider and leader of your new faith. This will protect your life, possessions, and business from many conditions which would make you lose.

For stability and consistence in acquiring more of riches, one needs to know the source or the direction of his blessings.

Get to know according to your call, ability, and interest that improvement and excellence in the same direction or discipline may increase because there is right direction.

After knowing the source or direction of your blessing, it will be much easier for you to work towards your success and victory in the same direction. This will simplify life, and maximize the receiving of information in the same discipline leading to perfect work.

For example

A priest will believe in his ministry he will direct his efforts in the same direction to develop and enjoy the benefits associated with the ministry. When God lays His call upon your life He will form a relationship to take care of your life in everything you do. He will give you favor, power, and strength to confirm His blessing in the direction of His calling. Being the giver and we the receivers, receivers will identify the sources of their blessings and walk in the path of His calling because it is with God to direct our steps into all levels of achievements. In many cases when God blesses us we tend to develop a state of dishonest by managing our funds outside His will. Dishonesty is bad.

Any level attained in acquiring wealth as a result of God's blessing must be treated, kept or presented depending on

biblical principles which govern the interests of God in your finances.

Even if your income does not give the positivity you expect not like those rich men you see and admire.

Still in the same faith you have a position in life a level where you operate your faith. To expose and reflect the exact glory of God through your good conduct, self-discipline, a character that drives others to see God in your life. Our God is a God of rich and poor, popular and those who are not popular. In our faith if we keep upright and faithful to God He will raise our financial levels depending on our faith.

In the process of building our faithfulness and obedience He will make us great and powerful in finances. The same blessings He commanded in His Holy scriptures shall we receive them dwell in peace and glorify His name.

We ask you our dear Lord God to answer our requests and bless all those things we do as we continue to find more of your goodness and presence.

Not until she prayed in the right direction. She received her blessings and prosperity after obedience. Marion a young lady who started a small business in a small town on the street. She had opened up a business of selling apples and other fruits. She believed that she will make it just like other business ladies. Marion had received a loan from bank to boost her business and paying her rent for months. She was a good Church goer and a prayerful person. She acted from the beginning to pay for her tithe and her offerings where she believed that God would not

let her go with unanswered questions in her life. Six months of her first beginning, Marion had realized profits, comfortably believed that she would be able to pay for her rent and other needs of life. One and half years in business according to her testimony challenges arising from workplace, high transport costs and unstable prices on the market was on her doorstep. This made Marion to lose hope and moral.

But two years back God had given Marion a conviction and a dream to return to her small town in her homestead to open up a business in coffee selling. Marion tells to have had a dream, she was deeply touched and believed that God will make away in the days of confusion and no direction. She took a step of joining her Pastor for prayers. She was prayed for, both believed in changes and miracles. After days had passed she believed in what God had talked to her.

Marion was able to collect enough capital for her next business where she believed and hoped that it was her call and right direction to have a business in coffee selling. She left to a small town in her homestead and opened up a business in coffee selling. After a period of two months, Marion tells to have been a successful woman. She increased her tithing and offerings. Now a happy woman in her business.

### **Simple ideas about prosperity**

To become rich is a right of any person whether you were born in a poor family or in a society which does not favor what you have for your next level.

This gives a clear picture that gaining wealth may not depend on opportunities of resources you were born with. But it starts with continuous outflow of ideas encouraged by the desire to be competitive in pursuing the goals of your dream to become rich. When you develop a desire and a dream to make a change in your life this will make you to take steps in using chances seen as little opportunities. Using them timely, effectively for increment and multiplication.

When ideas are born in the direction of wealth creation you will continue to propel your faith to initiate the habit of forming and managing the following:

- i) Time management.
- ii) Grouping yourself with members who have obtained a higher level of knowledge in wealth creation.
- iii) Right interpretation of available chances.

The aspect of proper time utility will allow opportunities of different kinds availing in our everyday life signaling that we may aggressively use them as they appear from time to time. This gives us a way forward to be observant and careful about chances happening in our everyday life. This could be people, places, money or families. The idea to realize chances as they appear in their right time requires enough information and past experience. Any person who does not depend on history and past experience will never maximize his chances of creating good things out of them. This tells us to be careful about what we know always in time in pursuing our expectations.

The question of grouping ourselves, moving with friends or people we find in life. Sharing information, opinions as we continue to create close relationship with them, has become a turning point and determinant to our success, breakthroughs and deliverances. Our interactions or friends we find in life will always affect our steps ahead. They may create a down fall or leads us into good things as they continue to affect our decisions and sometimes the direction we would like to take.

When we group ourselves with members who have shifted to a level required by the Spirit we will pick resourceful ideas allowing time and a way to our prosperity.

Sometimes we believe that business stands greater chances of generating more money than other sources. We believe that chances are higher increasing levels of income to gain wealth at any level. A clear picture draws our attention to the fact that any open door of any kind can be propelled and blessed by God. This also makes us to accept such chances however challenge full may be. For example, business may need high purchasing power, customer care, values which consists experience and skills for its growth and stability. Literally at this point to initiate the habit of making funds is not to wait for the above requirements but aggressively to start with such open doors as seen in life. Accepting that God can show up for greatness making us to excel from all sides of life. Through faith we can sprout to do bigger things. In this way rising to glory and bigger wealth starts with focusing which is also vision. Most of the ideas to rule, manage and bring all what is needed to make it visible and physical is driven from a wide range of vision you have for that

reason. Vision bearers are also excelling figures on the way. Believing that visions are the sources of power to make things visible and physical.

Gaining wealth and possession is a kingdom requirement which means that God keeps on demanding multiplication of those little opportunities of faith, money, time that their increase may be able to run our faith.

### **Concepts about business success**

For any person who has accepted the love of God and His promises should know that God is willing and able to bring the future he hopes for, from the time you began to observe His commandments and grace through Jesus. Some members take serious notice of finding out where God is who has been blessed by Him through testimonies and how much He can do for them. His invisibility does not deny us to exercise our faith through righteousness and following what is right.

Developing success at work or in business should be accompanied by re-organizing or adjusting areas which are regarded as fundamentals in business growth.

Management.

Type of investment.

Treatment of profits.

### **Management**

To manage in a simple way is to control to avoid wastage or using appropriate methods or information to accept a formal way of maintaining systems. Keeping smooth running of systems

in an organization. God is expecting us to be good managers of opportunities deposited in life. This could be opportunities of finances, time, relationships, business or others.

In this attention, everyone is invited to manage faith, life and chances happening in life attaining full grace. Since our God keeps on providing to us with time. This requires extra attention and observation of things happening in life as they contain chances for us to raise our standards required by Him.

The question of managing faith deposited is the question of understanding and knowing available grace given in life. As life goes on God will accept to provide enough faith, this faith may appear as different opportunities you see in life.

Including the Holy Spirit, finances, families and power to obey God. But in this manner, our interest lies in managing all those opportunities to shape up the actual character in managing chances including business.

Any person blessed by God to have a business or any income generating activity should note or consider values we are expected to have for the effectiveness and growth of a business. Still to say that there are other parts of a business which encourage business growth including time management, funds reservations, communication during business operations and vision of the business.

The accountability and management of a business will always be affected by the nature of the vision of a business. How big is your vision concerning what you are doing?

How far have you gone in laying down strategies for improvement?

Realities in managing business profits and the purpose of the vision includes the knowledge of reserving funds. More strategies to increase on the income of the business to meet the requirements of the vision of a business. In life sometimes when we continue to attend, receive and manage what God has given us we become used losing the moral, the mandate and communication to our clients because we have made enough or excess of our expectations. In this way we lose vision and direction. This does not please God because working generally is a command from God and also away of serving others whether we have or not.

### **Type of investment**

Sometimes we move to opportunities which are good but not approved by God. Managing business in line with God's will is an opportunity to be safe with your calling, because His leadership extends in all areas of our lives.

The type of investment must reflect the righteousness of your decisions since different callings or professionalism are given or accepted for proper application or installation of faith. Our faith formation forming abilities to lead us into perfection, includes accepting what God says about our growth in faith and finances. When we accept God in every corner of our lives including God being part of our financial development, our faith will speed together with Him. Locating our faith and decisions in the right direction of operations as according to the call upon our lives.

## **Treatment of the profits**

After the realization of profits in a business besides meeting the commandments of God in tithing and offering to God, the profits of a business are to serve the purpose of the vision of a business. We are to direct funds facilitate and follow what the vision says. Prepare the vision, write it down, pray about your vision and keep it aside for references and guidance.

The vision of your expectations of any commercial activity must comply with the facts, principles to rule decisions with an aim to operate faithfully.

Business profits must also meet the interest and purpose of God's involvement and His blessings in our businesses. Prepare to treat part of your profits by putting aside some funds with the purpose of reaching out to those who are in need, blessing them with what God has blessed you that they may glorify His name through the good work of your hands.

## **Conditions**

Some people believe that the financial improvement of a person will depend on the amount of money or resources that person have.

According to God's power to bring us good life and prosperity there are more chances of success and victory in the world of acquiring wealth and riches than we think or expect.

In the state of observing the two sides helping human Spirit and mind to setup goals or finding the best of life the Spiritual world

work together with the physical world to rule, influence, and command the quickness of our answers according to our prayers. Using the method of developing first the Spiritual content to rule your development in finances is an added life advantage and away of enjoying prosperity because the Spirit can do all in His power to affect our quickness in possessing.

We have seen testimonies of many people God has delivered from poverty and now they are big men and women in ministries and business.

The following methods can help you to develop your financial life:

- i) Constant and powerful prayer concerning your prosperity.
- ii) Using the word of God to declare victory over challenges.
- iii) The act of tithing and giving.

### **Mr. Mulungi**

Mr. Mulungi a pastor in a certain church, a successor of father Kasamba was married to a wife and had nine children. He was a civil servant in post and telecommunication Company.

He had spent a long time in the company where he earned a little salary that was not enough to meet the needs and demands of his family. He had some opportunities of receiving money for his own investment by the time he had joined the company. Out of several chances Mr. Mulungi did not get a chance of receiving and attaining his dreams and desires.

He repeatedly urged in his Spirit whether God can make him like those rich men he used to see and admire.

He lived in bad financial states for some time not until he discovered the secret of prayer as a weapon that many have used to become winners of God's blessings, promises and total deliverance from poverty. In the season of his 49<sup>th</sup> Christmas celebrations Mr. Mulungi received a letter from Mr. Ndugwa. Mr. Ndugwa a family leader of the family of Mr. Mulungi. In the late evening of the same day Mr. Mulungi had a smile on his face.

From the letter, there was an opportunity of selling a piece of land in the middle of the small town outside the capital.

The land that Mr. Mulungi by succession had possessed later discovered by Mr. Ndugwa became an opportunity for Mr. Mulungi to become a peaceful and a rich man of the season.

After the selloff Mr. Mulungi left on Friday late evening of the same month for a night prayer. He had written down his business proposal and a prayer request for the prosperity and development of the rest of his life.

Mr. Mulungi tells to have spent the whole night praying, anointing what he had received as his beginning capital and the only blessing that he wanted God to multiply and increase.

After some time, he opened out a business next to his homestead and bought along van to serve in his business. After a season he managed to buy another land as twice as big, he also opened out another business in transport.

His first business is now booming, God has made it possible, he is among the rich men of that area.

## **Madam Sofia**

It was in the middle of the night when Madam Sofia was in a deep sleep. Suddenly the Spirit took her by sight and made her to wake up. Upright on her bed, she opened her bible and began to pray. In her prayers the Spirit remembered her to pray for her husband concerning financial situations in their home. Mr. Musoni a machine operator in textile industry.

According to Madam Sofia's prayer, in the same month Mr. Musoni was given promotion and a salary increment at work. He thanked God, his life improved and changed completely. Praise God! Praise God! She testified in the church full of Joy of what God had done for her husband.

### **More of His blessings**

When we come to the altar for more grace and pardoning, we are to engage and direct our faith to walk with God through prayers, asking God to continue to dominate and rule over our lives. The search of God and His righteousness will draw more of His power of His hand to increase and bring more protection over our possessions. He wants us to walk more into His promises that we may get more of what He Has as blessings to last forever. God keeps on reminding us in His Holy scriptures that He can and wants to do exceedingly more in our lives if we continue to build up the vibrancy of the relationship that He envisioned for us with Him. We do not have all the answers for all our questions in this world but we have opportunities to pray

direct to God through Christ who additionally increase our energy to be able to have power to do things.

His mighty power to work in you and accomplish all in your life will enable you to achieve more than your greatest requests, your most unbelievable dreams, exceeding your widest imaginations.

When we do not see God's blessings in our lives, we are advised to go for more grace calling God to bless us just like Jabez who cried out to God for the enlargement of his boundaries and continuous blessings in his life time. The purpose of God's blessings to us is that others may see what God has done, share His blessing and know the love of God through us.

Going deep into prayers, getting to know more about the truth and power behind His word will also enable us to build or put other social, relational or intellectual areas of our lives upright.

If we are to tap and use God's blessings or what He Has prepared for us, we are to increase the Spiritual contents since He is a Spirit and the Spirit rules.

The life of becoming right and Holy develops from the desires to access more information through listening, accepting changes.

When God is carrying out our salvation, He does not stop only on Spiritual matters, but He continues to create a relationship with your mind by feeding it with His word increasing knowledge to manage faith and increase greatly.

Since God keeps on providing favorable and essentials in our environments that we may benefit more from them.

Our decisions to each and everything will determine the rate at which your increase in faith increases.

As children of God we continue to receive more from Him making the state or conditions of having enough faith and grace because He loves us. God is expecting us to identify weak areas in our lives and take a step of using the word of God to eliminate all our weaknesses and turn away from our wicked ways.

If we continue to cleanse and update our minds. He is willing to forgive our sins and accept our petitions.

### **Winners of God's blessings**

Winners of true God's blessings are people who are outside the class of those who corrupt, defile the knowledge of God concerning finances, those who mismanage God's assignments in their lives or their purpose in life.

Life starts with the desire to become one that you expect in future no matter how poor you are the little experience you have or the background of your life. To become a winner of God's true blessings, you must see exactly what you need to have as part of your blessing in life and the steps you need to take to get what you need. This will bring a full satisfaction of your heart because you have seen and you are in the right direction to receive what you want. In most cases, people who delay to get their blessings are not in the right direction or places where God has located their blessings or not in the direction as according to God's will for their lives. Before you start anything or you get involved in

anything first find out on the side of God whether you are in the right direction concerning what you are supposed to do.

Hardworking is highly recommended but still God can also bless your life if you pray to Him about what you want and resolve yourself to simplicity and generosity always.

The story to become rich or wealthy is simple if you continue to seek God and search more knowledge and information concerning that reason.

We have had enough testimonies, we have prayed for people about the same problem and we have counseled enough individuals and groups about the same issue of getting well in finances. But the question of Spiritual matter has been a reputation as an obstacle in people's success and their breakthrough in their financial lives. When you start with faith walk in faith and finish in faith. Sometimes our faith is too little to deal with our Spiritual lives or contents because it is through the Spirit of God that we are able to become victorious and people of good reputation. Our Spiritual matters control our relationships, finances and behaviors.

If we continue to pray and backup our Spiritual matters, it means that we have answered many questions in our lives, those we see and those we don't see including our lives becoming financially good and spiritually good. We have a question. How do we know that our faith is little or our Spiritual life is too low in commanding our blessings. The answer is that we may not see our Spiritual lives physically or see what is happening in the Spiritual world, but our duties to work upon our Spiritual lives

should continue through attending to God's word, visiting places where we can find God. Places where we find God's presence are also operating areas of the Holy Spirit.

We must visit places where the Spirit is because when we visit we get into fellowship with the Holy Spirit and has power to make us what He wants most probably according to our prayers.

The Author of this first edition is an interpreter, an observer, purpose driven as well as a businessman. Mr. Semyalo David is an interpreter of issues and challenges in these last days.

The introductory phase to faith arena, explains the three great parts of faith.

The truth in science and technology.

The truth in reproduction.

The truth in ground opportunities.
